May 7th 1840 was the birthday of one of the most famous Russian composers of the nineteenth century: Peter Ilyich Tchaikovsky, the son of a mining inspector. Tchaikovsky studied music as a child and later studied composition at the St. Petersburg Conservatory. His greatest period of productivity occurred between 1876 and 1890, during which time he enjoyed patronage of Madame von Meck, a woman he never met, who gave him a yearly living stipend. Madame von Meck later terminated her friendship with Tchaikovsky, as well as his living allowance, when she, herself, was facing financial difficulties. It was during the time of Madame von Meck’s patronage, however, that Tchaikovsky created the music for which he is most famous, including the music for the ballets of “Swan Lake” and “The Sleeping Beauty”. Tchaikovsky’s music, well-known for its rich melodic and sometimes melancholy passages, was one of the first that brought serious dramatic music to dance. Before this, little attention had been given to the music behind the dance. Tchaikovsky died ostensibly of cholera on November 6th 1893, though there are now some scholars who argue that he committed suicide.

Question 38. The best title for this passage could be ______.
A. “The Life and Music of Tchaikovsky”  B. “Development of Tchaikovsky’s Music for Ballets”
C. “Tchaikovsky’s Relationship with Madame von Meck”  D. “The Cause of Tchaikovsky’s Death”

Question 39. According to the passage, all of the following describe Madame von Meck EXCEPT ___.
A. she had economic troubles  B. she was generous
C. she was never introduced to Tchaikovsky  D. she enjoyed Tchaikovsky’s music

Question 40. According to the passage, Tchaikovsky’s music is most well-known for ______.
A. it’s repetitive and monotonous tones  B. the ballet-like quality of music
C. the richness and melodic drama of the music  D. its lively, capricious melodies

Question 41. Which of the following is NOT mentioned in the passage?
A. Tchaikovsky’s influence on ballet music.  B. Tchaikovsky’s unhappiness leading to suicide.
C. The patronage of Madame von Meck.  D. Tchaikovsky’s productivity in composing.

Question 42. It can be inferred from the passage that ______.
A. it was not the music behind the dance that made Tchaikovsky famous
B. there is suspicion on the cause of Tchaikovsky’s death
C. Madame von Meck was one of the most famous Russian composers
D. Madame von Meck was one of Tchaikovsky’s girlfriends

In 1972, a century after the first national park in the United States was established at Yellowstone, legislation was passed to create the National Marine Sanctuaries Program. The intent of this legislation was to provide protection to selected coastal habitats similar to that existing for land areas designated as national parks. The designation of an area a marine sanctuary indicates that it is a protected area, just as a national park is. People are permitted to visit and observe there, but living organisms and their environments may not be harmed or removed.

The National Marine Sanctuaries Program is administered by the National Oceanic and Atmospheric Administration, a branch of the United States Department of Commerce. Initially, 70 sites were proposed as candidates for sanctuary status. Two and a half decades later, only fifteen sanctuaries had been designated, with half of these established after 1978. They range in size from the very small (less than 1 square kilometer) Fagatele Bay National Marine Sanctuary in American Samoa to the Monterey Bay National Marine Sanctuary in California, extending over 15,744 square kilometers.

The National Marine Sanctuaries Program is a crucial part of new management practices in which whole communities of species, and not just individual species, are offered some degree of protection from habitat degradation and overexploitation. Only in this way can a reasonable degree of marine species diversity be maintained in a setting that also maintains the natural interrelationships that exist among these species.

Several other types of marine protected areas exist in the United States and other countries. The National Estuarine Research Reserve System, managed by the United States government, includes 23 designated and protected estuaries. Outside the United States, marine protected-area programs exist as marine parks, reserves, and preserves. Over 100 designated areas exist around the periphery of the Caribbean Sea. Others range from the well-known Australian Great Barrier Reef Marine Park to lesser-known parks in countries such as Thailand and Indonesia, where tourism is placing growing pressures on fragile coral reef systems. As state, national, and international agencies come to recognize the importance of conserving marine biodiversity, marine projected areas, whether as sanctuaries, parks, or estuarine reserves, will play an increasingly important role in preserving that diversity.

Question 43. What does the passage mainly discuss?
A. Differences among marine parks, sanctuaries, and reserves

A. is not well known  B. was not originally proposed for sanctuary status  C. covers a large area  D. is smaller than the Fagatele Bay National Marine Sanctuary

Question 47. According to the passage, when was the National Marine Sanctuaries Program established?
A. Before 1977  B. After 1987  C. One hundred years after Yellowstone National Park was established  D. One hundred years before national parks were established

Question 48. According to the passage, all of the following are achievements of the National Marine Sanctuaries Program EXCEPT
A. the establishment of areas where the public can observe marine life
